TopLine – reliable hygiene management
for the dirty utility room

Compliance with laws and standards, the duty of care and health and safety in the workplace, regular monitoring and recording of hygiene-related activities: these are just some of the essential requirements placed on the modern nursing profession everywhere in the world. The objective is clear - the prevention of infectious diseases in hospitals and care homes.

MEIKO will provide you with active and professional know-how and innovative, reliable cleaning and disinfection technology: hygiene security from a single source – from the planning stage, technology and chemicals via service right through to professional consultancy in a spirit of partnership, including after-sales assistance.

With our comprehensive hygiene management service which is fine-tuned to the requirements in your premises, we are your dependable partner in the implementation of legal and hygiene-related imperatives.

This is how TopLine will help with the prevention of infections and the protection of patients and staff alike.

- Complete system disinfection at every program start
- Care utensils cooled and dried using HEPA filtered air
- Completely steam-tight system. No discharge of steam at all, even not when the door is opened at the end of the program
- Certified according to EN ISO 15883 by an independent and accredited test institute.
- Energy-optimised disinfection process. Only the energy needed to achieve the pre-set A_0 value is consumed
- Display of the AIM and ACTUAL A_0 value
- A_0 value of 60 and more can be set at will
- Communicative 4 x 20 characters plain text display with energy saving mode
- Nozzle system arranged to provide intensive cleaning, with unique controllable telescopic rotary jet for precisely targeted internal cleaning of the care utensils
